

A photograph of a Clifton Unstirred Bath, a piece of laboratory equipment. A large glass Erlenmeyer flask is placed inside the bath, containing water that is vigorously boiling, with steam rising from the top. The bath has a digital display showing '18' and a red indicator light. The brand name 'Clifton' and 'UNSTIRRED BATH' are visible on the front panel.

Clifton Range[®]

NICKEL - ELECTRO LTD.
Manufacturers of the Clifton Range

Welcome to the *Clifton Range*® from Nickel-Electro Ltd

The Clifton Range® is part of Nickel-Electro Ltd, a family firm based in Weston-super-Mare which was incorporated as a limited company in 1941, but its roots can be traced back to 1935 when the business first started. Now in its 3rd generation of family members, the company prides itself on being a strongly established, independent British manufacturer.

The company's original name back in 1935 was Nick-El-Ectro and upon incorporation in 1941 changed to Nick-El-Electro. In 1964 the company name was finally settled as Nickel-Electro, a much easier name to pronounce!

Continuous investment in the latest manufacturing and information technology means that the company can remain competitive and innovative with new products and designs.

Over the years Nickel-Electro has developed into a leading manufacturer of laboratory consumables and equipment. The company has extensive knowledge and expertise in manufacturing highly accurate temperature control equipment for the scientific market.

The Clifton brand takes its name from The Clifton Suspension Bridge in Bristol, which was designed and built by the famous Victorian engineer Isambard Kingdom Brunel and is recognized as engineering excellence.

DIGITAL AND ANALOGUE BLOCKHEATERS

BH-1 series, Blockheaters

Clifton® Blockheaters provide a safe, dry and consistent method of heating accessory aluminium blocks with excellent thermal conductivity for heating tubes.

Cat No.	BH-1/DIG	BH-1T
Temperature range	ambient + 5°C - 150°C	ambient + 5°C - 120°C
Temperature control	0.1°C digital LED	analogue dial
Uniformity	±0.1°C @ 60°C	±0.5°C @ 60°C
Sensitivity	±0.1°C @ 60°C	±0.5°C @ 60°C
Temperature alarm	+ 4° C with heater cut-off, indication	-
Timer resolution	1 minute	-
Timer setting	variable, 00hrs.01mins - 99hrs.59mins	-
Heater, Watts	250W	
Well capacity ¹	1 or 2 blocks	
Well dims	140w x 50d x 72h mm	
Overall dims	200w x 295d x 85h mm	
Voltage	230V	

1. Two of following accessory blocks can be fitted into heating well: DBK-0.2, DBK-0.5, DBK-1.5, DBK-2.0

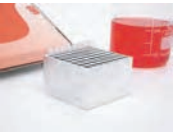

2. Wide range of accessory blocks available.

3. BH-1/DIG is dual point calibrated at Factory.

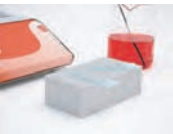

Factory pre-set two point calibration on every unit BH-1/DIG only.

ACCESSORIES

Any two blocks can be fitted in heating well, for micro tubes

DBK-0.2	0.2ml micro tube block 54 holes	DBK-0.5	0.5ml micro tube block 16 holes	DBK-1.5	1.5ml micro tube block 12 holes	DBK-2.0	2.0ml micro tube block 16 holes
							

Any one block can be fitted in heating well, for tubes

DBK-0	Plain block	DBK-10	10mm x 32 hole block	DBK-12	12mm x 32 hole block	DBK-13	13mm x 32 hole block
							
DBK-16	16mm x 18 hole block	DBK-19	19mm x 10 hole block	DBK-25	25mm x 10 hole block	DBK-50	50ml x 8 hole block
							

Bath Armor™ accepts any tube size

BA-0.5 Bath Armor 0.5 litre

Alternative to blocks, thermally efficient, accepts any size shape tube or vessel the same time.

Slide Dryer

HIST-14 Slide Dryer for BH-1T

DIGITAL AND DUO BLOCKHEATERS

BH-2 series, Blockheaters and DuoBlockHeater

Clifton® Blockheaters provide a safe, dry and consistent method of heating tubes and microtubes with precise temperature control. Available in single, double and DuoBlockHeater™ formats, the latter allowing independent control of each block in one space saving format.

The hinged lid provides incubation for microtubes and microplates.

THERMOSTATIC HOTPLATES

HP-1 series, Analogue Thermostatic Hotplates

These Clifton® analogue hotplates feature a generous working area, thermostatic control, with an illuminated on/of switch, heater and hot warning indicators.

Featuring a hob surface overlaps the body to ensure that no spillages enter the controls. The hob is solid aluminium for excellent thermal properties and even heat distribution.

Cat No.	HP1-1	HP1-2
Temperature range	ambient + 10°C - 350°C	
Temperature control	Analogue thermostatic control	
Sensitivity	± 10°C @ 150°C	
Heater, Watts	1000W	2000W
Retort points	single M10 fixing point	double M10 fixing points
Hotplate dimensions	305w x 240d mm	457w x 305d mm
Overall dimensions	305w x 240d x 200h mm	457w x 305d x 200h mm
Voltage	230V	

Features Include:

- * Accepts standard laboratory retort rods for scaffolding to be constructed.
- * Solid aluminium top plate with excellent thermal properties.
- * Hob overlaps the controls ensuring spillages do not ingress into controls.
- * Hot warning indicator

SANDBATH KITS

These kits provide a frame for sand to be contained on the hotplate allowing vessels to be heated from the base and sides being partially immersed in sand.

Cat. No.	Description
SB1-1	Sand bath kits for HP1-1 and HP1-1D Hotplates.
SB1-2	Sand bath kits for HP1-2 and HP1-2D Hotplates.
SB1-3	Sand bath kits for HP1-3 and HP1-3D Hotplates.

RETORT RODS FOR LABORATORY SCAFFOLDING

These retort rods with M10 fixing fit retort points at rear of each hotplate and with laboratory clamps hold hot vessels safely and securely in use. They also provide basis for affixing laboratory scaffolding to the hotplate.

Cat. No.	Description
8611	Retort Rod - aluminium - 600mm x 12mm diameter
8614	Retort Rod - aluminium - 500mm x 10mm diameter
8624	Retort Rod - stainless steel - 500mm x 10mm diameter
8631	Retort Rod - mild steel - 600mm x 12.5mm diameter
8632	Retort Rod - mild steel - 750mm x 12.5mm diameter
8633	Retort Rod - mild steel - 1000mm x 12.5mm diameter
8634	Retort Rod - mild steel - 500mm x 12.5mm diameter

DIGITAL HOTPLATES

HP-1D series, Digital Hotplates

These Clifton® digital hotplates feature precision PID control providing degree by degree temperature setting and control.

Featuring a hob surface overlaps the body to ensure that no spillages enter the controls. The hob is solid aluminium for excellent thermal properties and even heat distribution over its working area.

We verify the performance of each Hotplate calibrating its controls and hob temperature.

Cat No.	HP1-1D	HP1-2D
Temperature range	ambient + 10°C - 350°C	
Temperature control	PID digital, LED display, resolution 1°C	
Uniformity	±0.5°C @ 60°C	
Sensitivity	±0.5°C @ 60°C	
Timer	variable, 00hrs:01mins - 99hrs:59mins	
Heater, Watts	1000W	2000W
Retort points	single M10 fixing point	double M10 fixing points
Hotplate dimensions	305w x 240d mm	457w x 305d mm
Overall dimensions	305w x 240d x 200h mm	457w x 305d x 200h mm
Voltage	230V	

Features Include:

- * Accepts standard laboratory retort rods for scaffolding to be constructed.
- * Solid aluminium top plate with excellent thermal properties.
- * Hob overlaps the controls ensuring spillage's do not ingress into controls.
- * Settings for temperature control only or a combination of temperature and time. Timer commences on hob reaching set temperature.
- * Auto setting over temperature alarm.

CABINETS THERMOSTATIC

NE7-ST+ series, Thermostatic Cabinets

Clifton® Thermostatic Cabinets provide chamber temperatures settable from 3°C to 40°C, a cost effective alternative to Cooled Incubators.

Thermostatic Cabinets provide a combination of heating and cooling producing a controlled environment with fan circulation for consistent chamber temperature. Featuring bold illuminated LCD display with easy to use touch sensitive controls on a wipe clean surface.

The aluminium lined chamber features a solid hinged lockable door and an access port. Supplied with wire shelves that can be adjusted for height on runners inside the chamber.

Factory calibrated at 37°C and supplied with certificate.

COOLED INCUBATORS

NE7 series, Cooled Incubators

This series of Clifton® Cooled Incubators feature precision temperature control with programming options providing consistent chamber temperatures. Depending on model, controls either feature touch sensitive keys with illuminated LCD display or colour touch screen.

Featuring high grade stainless steel chamber sealed shut with a solid door.

These Cooled Incubators can be fitted with a range of accessories including internal glass door, viewing window in the door, additional shelves and Photoperiodic or Phytotron lighting.

PH-10-750	10 light elements, door mounted, for 750 litre incubators

ADDITIONAL ACCESSORIES ARE AVAILABLE ASK FOR DETAILS.

FAN CIRCULATION INCUBATORS

NE8 series, Incubators, fan circulation

Clifton® Incubators feature intuitive easy to use controls with on screen guidance within a bold illuminated LCD display, offering precise time and temperature control from ambient +5°C to 100°C.

The Incubator can run at a set temperature immediately, delay start or commence to start in the future at a given date and time. Additionally with three available programs with up to 6 segments in each program, which allows the creation of temperature time profiles of your choice.

All control surfaces feature smooth easy to wipe clean surfaces.

The digital microprocessor controls feature real time clock, diagnostics, digital LCD display to 0.1°C resolution, dual pt100 probes, including event log and data log of actual temperatures along with USB and RS232 interface. Every unit is supplied with a Calibration Certificate for validation.

Featuring a stainless steel interior with stainless steel outer case powder painted. Particular attention paid to providing a good tight door closure an hinge design to maintain a sealed chamber in use. Case is well insulated to reduce heat loss in use. Access port fitted as standard.

W-240	Door with viewing window, for 240 litre incubators
W-400	Door with viewing window, for 400 litre incubators
W-750	Door with viewing window, for 750 litre incubators

WIRE SHELVES

Cat No.	Description
WS-56	Wire shelf, max 10 kg load, for 56 litre incubators
WS-112	Wire shelf, max 10 kg load, for 112 litre incubators
WS-240	Wire shelf, max 10 kg load, for 240 litre incubators
WS-400	Wire shelf, max 10 kg load, for 400 litre incubators
WS-750	Wire shelf, max 10 kg load, for 750 litre incubators

PERFORATED SHELVES

Cat No.	Description
SP-56	Perforated shelf, max 10 kg load, for 56 litre
SP-112	Perforated shelf, max 10 kg load, for 112 litre incubators
SP-240	Perforated shelf, max 10 kg load, for 240 litre incubators
SP-400	Perforated shelf, max 10 kg load, for 400 litre incubators
SP-750	Perforated shelf, max 10 kg load, for 750 litre incubators

DRYING OVENS

NE9 series, Drying Ovens, fan circulation

Clifton® Drying Ovens feature intuitive easy to use controls with on screen guidance within a bold illuminated LCD display, offering precise time and temperature control from ambient +5°C to 300°C.

The Oven can run at a set temperature immediately, delay start or commence to start in the future at a given date and time. Additionally with three available programs with up to 6 segments in each program which allows the creation of temperature time profiles of your choice.

All control surfaces feature smooth easy to wipe clean surfaces.

The digital microprocessor controls feature real time clock, diagnostics, digital LCD display to 0.1°C resolution, dual pt100 probes, including event log and data log of actual temperatures along with USB and RS232 interface. Every unit is supplied with a Calibration Certificate for validation.

Featuring a stainless steel interior with stainless steel outer case powder painted. Particular attention paid providing a good tight door closure and hinge design to maintain a sealed chamber in use. Case is well insulated to reduce heat loss in use. Access port fitted as standard.

NE9-S series controls, touch keypads, illuminated LCD display

Capacity, litres	15 l	32 l	56 l
Internal Dims ²	320w x 180d x 240h mm	400w x 250d x 320h mm	395w x 360d x 395h mm
Overall Dims	440w x 350d x 520h mm	520w x 435d x 600h mm	590w x 560d x 700h mm
Door configuration	Single door	Single door	Single door
Sensitivity @ 70°C ¹	±0.7 °C	±0.4°C	±0.3°C
Uniformity @150°C ⁴	±0.7 °C	±0.4°C	±0.3°C
Shelves fitted	1	1	2
Shelves max no.	2	3	5
Watts	600W	1100W	1600W
Voltage	230V	230V	230V
Weight	27kg	37kg	61kg

1. Sensitivity measurements based on temperature readings on shelf in centre of the chamber.

2. Working capacity of chamber can be smaller.

3. Before ordering please check the room or building access where this Incubator will be installed and electrical power requirements.

4. Uniformity measured in vertical axis in the chamber using Wired Shelves.

Features Include:

- * Temperature
 - range: ambient +5°C to 300°C
 - dual pt100 temperature probes
- * Controls, NE9-S series
 - Intuitive to use controls, illuminated LCD display, touch sensitive keypads with prompts.
 - Run continuously at set temperature, delay start or commence to start on a date and time in the future.
 - Offers 3 programs, up to 6 temperature and time time segments in each program.
 - Program control of fan speed, exhaust air flap, temperature, time, immediate start, delay start, future start.
 - Data logging to USB.
 - Auto diagnostics with sensor alarms.
 - Power fail alarm, recording and resumption.
 - High and low temperature alarm.
 - Door opening sounder and alarm.
 - Over temperature protection and sample protection.

ACCESSORIES AVAILABLE ASK FOR DETAILS.

KS series, Koch Steam Steriliser

Koch Steam Sterilisers boil water to produce steam for sterilising laboratory instruments and non-porous equipment.

Removable shelves with looped handles make for retrieval and ease loading and unloading.

The lid is designed to ensure steam is condensed and runs back into the chamber. Insulated handles are fitted to lid and unit.

For safe steaming the water level is governed by a reservoir which requires connection to a regulated water supply, to maintain safe water level and boiling water.

Service and Support

Nickel-Electro Ltd provides comprehensive spares, product support and aftercare service.

Investing in the Future

We recognise the importance of investing in new technology, and have an on going programme of investment in the latest manufacturing equipment and information systems.

A wide Range of Products for a wide range of Markets

We produce laboratory equipment for a variety of market sectors. These include hospitals, secondary and higher education, the food and dairy industry, veterinarians, pharmaceutical companies, industry and quality control laboratories.

World-wide Reputation

Upholding the traditions of high quality British products, Nickel-Electro Ltd exports around the globe, with major markets in Europe, the Middle East, Africa and Australasia.

Anti-bacterial surfaces

Anti-bacterial finishes inhibit the growth of bacteria. It has been tested by independent specialist test houses such as Law Laboratories (in the UK) using internationally recognized test methods and proven to be effective versus a wide range of bacteria species including *Escherichia coli* and *Staphylococcus aureus* (MRSA).

Hygienic coatings are part of a controlled approach to cleaner facilities. Within its formulation an active ingredient with proven anti-bacterial properties is bound into the coating. The efficacy of the finish applied to the Clifton range is maintained over its lifetime, as the anti-bacterial agent is integral within the paint.

In a busy laboratory environment, this finish effectively limits everyday bacteria transfer from operator to equipment and then on to other operators. This is one less source of contamination, contributing to essential clean working practices.

Key to dimensions

Trademarks

NE logo and Clifton range are registered trade marks of Nickel-Electro Limited.

Safety and Product marking

Clifton range laboratory equipment carries CE mark indicating that it meets the requirements of applicable European Directives.

The Clifton range meets International Standards BS EN 61010-1, Safety requirements for electrical and electronic equipment for measurement, control and laboratory use.

Equipment used for heating additionally meets BS EN 61010-2-010 Particular requirements for laboratory equipment for the heating of materials.

Equipment used for mixing additionally meets BS EN 61010-2-051 Particular requirements for laboratory equipment for mixing and stirring.

Centrifuges meet requirements BS EN 61010-2-020 Particular requirements for laboratory centrifuges.

The Clifton range meets International Standards BS EN 61326-1 Electrical equipment for measurement, control and laboratory use - EMC Requirements both A and B classes.

Every piece of Clifton equipment has a unique serial number, recorded on our database with its manufacturing inspection data. Every item is electrically tested for safety, and a copy of test certificate enclosed in the instruction book.

Temperature performance

We pride ourselves on assuring that Clifton range performs to the highest level. All Clifton temperature controlled equipment undergoes temperature calibration, in controlled conditions, to thoroughly test its performance before release to you.

Analogue controlled equipment is checked at one temperature over its working range against a UKAS calibrated reference device. We adjust the equipment to reference temperature.

Digital controlled equipment is checked at one or two temperatures over its range against a UKAS calibrated reference device measuring actual and indicated temperatures.

Quality System

Our products are designed, developed and manufactured in a tightly controlled ISO9001 environment and all products are CE compliant.

Environmental Policy

We recognise our responsibility towards the environment and fully aware of legislation, have a policy of re-use, recycle and waste minimisation.
